💎 Added value

Ease of use
- Easy to use via drag & drop
- Connect OT and IT systems in just a few minutes
- Intuitive operation - no expert knowledge required
- Reuse data transfers with connection templates

Reliability & Security
- Increased availability through redundant structure
- Prevention of data loss through store & forward principle
- Connection of redundant third-party systems possible (e.g. ERP, OPC server)
- Support of common security concepts (e.g. user management)

Scope & value retention

As a central communication platform, the OPC Router supports all the necessary protocols for your current and future systems.
